REMODELING & HOME MAINTENANCE

Airless Paint Sprayer

PS120B

EASY *TO MAINTAIN*

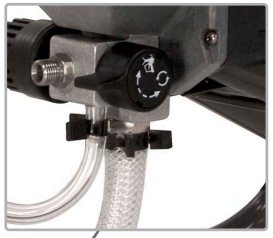
Critical internal components are constructed from corrosion and wear-resistant materials like stainless steel and carbide. They provide long-life wear, and are also service friendly.

EASY *TO USE*

Sprays oil and water-based paints; stains and sealers from 1 or 5 gallon buckets. Use for interior and exterior projects.

EASY *TO HANDLE*

25 ft. hose gives the ability to paint an average room without constantly moving the sprayer. Yet, it is compact and light-weight enough to move from room-to-room with ease.



EASY *TO OPERATE*

Single lever-action allows the unit to prime, then with a simple flip of the lever, you are ready to paint!

EASY *TO CONTROL*

Interchangeable spray tips and pressure adjustment knob. These components allow for tuning spray pattern and paint volume to match the project.
Includes spray gun with .015 in. (0,38 mm) tip and 25 ft. (7,62 m) high pressure airless hose.

SPECIFICATIONS					
MOTOR	1/2 HP / 7 Amps	GPM / L/min	0.24* / 0,9*	PSI	2800
